## ShillerMath Lesson Book 1 Sample Lessons

LESSON 1-3 SHAPES: HEARTS, DIAMONDS, RECTANGLES

| Objective: | Identify a heart, diamond, and rectangle |
| :--- | :--- |
| Manipulatives: | Wooden geometric shapes (\#148236) |
| Learning Styles: | Visual, Kinesthetic |
| Consumable? | Yes |

A. Lay down a heart shape on the mat: "This is a heart. Say 'heart' with me: 'Heart'."
B. Lay down a diamond shape next to the heart: "This is a diamond. Say 'diamond' with me:
'Diamond'."
C. Lay down a rectangle shape next to the diamond: "This is a rectangle. Rectangle."
D. "Show me the rectangle. Good! You may pick up and examine the rectangle."
E. "Show me the heart. Good! You may pick up and examine the heart."
F. "Show me the diamond. Good! You may pick up and examine the diamond."
G. "Now you may color the diamond red."

H. "Good! You may color the heart blue."

## LESSON 1-13 FINDING 1'S ON THE NUMBER GRID

| Objective: | Recognize number symbols |
| :--- | :--- |
| Manipulatives: | Crayons (\#147221) |
| Learning Styles: | Visual, Writing |
| Consumable? | Yes |

"Now we are going to do some fun coloring. See if you can color yellow every square that has a 1 in it."

## LESSON 1-112 NUMBERS: ABSOLUTE AND RELATIVE ESTIMATION

| Objective: | Practice estimation and counting |
| :--- | :--- |
| Manipulatives: | Measuring cup (\#148223), a number of small household objects |
| Learning Styles: | Visual |
| Consumable? | Yes |

Take out the 1-cup measuring cup and have handy a few (under 10) small rocks, paper clips, rubber bands, beans, and Cheerios (or other cereal or food). Note: These common household items are not included in the ShillerMath kit.

Place several rocks (between 1 and 9 ) in the measuring cup.
"Before we count, how many rocks do you think are in the cup? I will write your guess in your table."

| Object | Guess | Actual |
| :--- | :--- | :--- |
| Small rocks |  |  |
| Paper clips |  |  |
| Rubber bands |  |  |
| Beans |  |  |
| Cheerios |  |  |
|  |  |  |
|  |  |  |

"Good! Now let's count how many rocks there really are. I will write the number in the table." Repeat for each item. Space has been left for additional items if desired.
A. When you are done estimating and counting, ask, "Did you get better at guessing as time went on?"
B. "Why do you think that happened?"
C. "Why do you think sometimes it looks like there's a lot when there's only a little?"
o Shillermath All 3

LESSON 1-150 INEQUALITIES USING THE NUMBER LINE

| Objective: | Understand more about the number line and inequalities |
| :--- | :--- |
| Manipulatives: | None |
| Learning Styles: | Kinesthetic, Visual |
| Consumable? | Yes |

| \|-----------------------------------------------------------------------------------| |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | ---: |
| 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |

"Point to zero on the number line. Now point to two on the number line with your other hand."
A. "What number is between 0 and 2 ?"
B. "You may write the sign that goes between 0 and 2 ."
